

Course Schedule - Spring 2008

Linguistics

506 **Topics in Computational Ling** credit: 4 hours.

Provides an introduction to practical problems in computational linguistics in a laboratory setting. At the beginning of the semester, a substantial project will be assigned to the class, and the class will work as a team towards implementing a solution, and evaluating the final product against a test corpus, which will also be developed during the class. Topical readings will also be assigned and will be discussed. May be repeated if topics vary. Students may register in more than one section per term to a maximum of 8 hours and may be repeated in subsequent terms to a maximum of 12 hours. Approved for letter or S/U grading. Prerequisite: LING 406, and an introductory level Computer Science programming course, or consent of instructor.
