Crop Sciences

**CPSC 112  Introduction to Crop Sciences**  credit: 4 hours.

(Preceding CPSC 121) Introductory course covering principles of growth, production, protection, and improvement of crop plants. Topics covered include form, function, and uses of crops; mechanisms and factors responsible for plant growth and development; crop pests and pest protection; specific crops; and advances in crop production. Concepts are discussed in lecture and reinforced in corresponding hands-on laboratory sections.
