Class Schedule - Fall 2014

Statistics

STAT 430  **Topics in Applied Statistics**  credit: 3 OR 4 hours.
Formulation and analysis of mathematical models for random phenomena; extensive involvement with the analysis of real data; and
instruction in statistical and computing techniques as needed. Same as MATH 468. 3 undergraduate hours. 4 graduate hours. May be
repeated with approval. Prerequisite: STAT 410 or STAT 420; or consent of instructor.

Credit Hours: 4 hours
Survival Analysis
Restricted to Graduate - Urbana-Champaign.
Introduction to the analysis of time-to-event outcomes. Topics include censoring, discrete survival, parametric models,
nonparametric one- and K-sample methods, Cox regression, regression diagnostics, time-dependent covariates, and multivariate
survival outcomes. Emphasis on key underlying concepts and practical implementation. Prerequisites: STAT 410 and knowledge of
R. Recommended: STAT 420. Restricted to Statistics Graduate Students until May 5, 2014. Some seats are reserved for incoming
Statistics graduate students. If you receive a Reserved-Closed error, that means the course is full except for the reserved seats.

Credit Hours: 3 hours
Survival Analysis
Restricted to Undergrad - Urbana-Champaign.
Introduction to the analysis of time-to-event outcomes. Topics include censoring, discrete survival, parametric models,

Credit Hours: 4 hours
Professional Statistics Skills
Restricted to Graduate - Urbana-Champaign.
This project-based course emphasizes written, visual, and oral communication of statistical results and conclusions. An introduction
to statistical consulting is also provided. Additional topics may include introductions to statistical methodologies in industry and
are reserved for incoming Statistics graduate students. If you receive a Reserved-Closed error, that means the course is full except
for the reserved seats.
