Grand Challenge Scholars
The goal of the course is to have a personal impact on the world. This course will enhance your ability to address real world problems and convert visions into reality. Meets in 2320 DCL.

| 53157  | Lecture-Discussion  | ST      | 10:00 AM - 11:50 AM | M    | 1302 - Siebel Center for Comp Sci | Lilly, B Scrogum, J Walker, K |

Credit Hours: 4 hours
SustainableTech: Env/SocImpact
Topic: Sustainable Technology: Environmental and Social Impacts of Innovations. This class introduces the environmental and social impacts associated with technology at each stage of the product life cycle (design, manufacture, consumption, and disposal/recovery). Electronic products will be used as a case study and provide the framework for discussion of complex legal, economic, social, and environmental considerations.
