Mathematics

MATH 002  **Introductory Algebra**  credit: 3 hours.
Methods of elementary algebra, including simplification of algebraic expressions, solving linear and quadratic equations, equations of lines, systems of linear equations, and radicals. Enrollment is restricted. Credit may not be used toward graduation in the College of LAS. Prerequisite: Score on appropriate placement test, or consent of Mathematics Department.
This course is for students in the LAS Access and Achievement Program only.

Restricted to AAP - Undeclared students.
Restricted to Liberal Arts & Sciences.
Seats are reserved for LAS Access and Achievement Program students, specifically for Undeclared students until August 1, and then seats will open for EOP and PAP students in the college of Liberal Arts and Sciences. If you do not meet this requirement, please contact the Access and Achievement Program Office in 112 English Building to be placed on the waiting list.

MATH 103  **Theory of Arithmetic**  credit: 4 hours.
Analyses of the mathematical issues and methodology underlying elementary mathematics in grades K-5. Topics include sets, arithmetic algorithms, elementary number theory, rational and irrational numbers, measurement, and probability. There is an emphasis on problem solving. Priority registration will be given to students enrolled in teacher education programs leading to certification in elementary or childhood education. Prerequisite: MATH 012 or equivalent.
Students must register for one lab and one lecture section.
This course satisfies the General Education Criteria for a:
Quantitative Reasoning I

This section has a blended format in which half of the content is delivered in lecture and half is delivered online. See [http://www.math.uiuc.edu/timetable/](http://www.math.uiuc.edu/timetable/) for the schedule.

**MATH 115  Preparation for Calculus**  credit: 3 hours.

Reviews trigonometric, rational, exponential, and logarithmic functions; provides a full treatment of limits, definition of derivative, and an introduction to finding area under a curve. Intended for students who need preparation for MATH 220, either because they lack the content background or because they are not prepared for the rigor of a university calculus course. Credit is not given for both MATH 115 and either MATH 014 or MATH 114. Credit is not given for MATH 115 if credit for either MATH 220 or MATH 221 has been earned.
Prerequisite: An adequate ALEKS placement score as described at http://math.illinois.edu/ALEKS/, demonstrating knowledge of the topics of MATH 012.

This course satisfies the General Education Criteria for a:
Quantitative Reasoning I

Quant Reasoning I course.
Restricted to Liberal Arts & Sciences.
Seats are reserved for LAS Access and Achievement Program, specifically EOP and PAP students in the Liberal Arts and Sciences college. If you do not meet this requirement, please contact the Access and Achievement Program Office in 112 English Building to be placed on the waiting list. Placement in this course requires a recent U of I Math Placement Exam score of at least 50%. Failure to achieve the minimum score will result in removal from the course. For details see http://www.math.uiuc.edu/ALEKS.

Restricted to EOAP Std Ath&Affil-LAS AAP, EOP - Obligatory, Pres Award Program Recip, President's Award Honors, or AAP - Undeclared students.

MATH 119  Ideas in Geometry  credit: 3 hours.
General education course in mathematics, for students who do not have mathematics as a central part of their studies. The goal is to convey the spirit of mathematical thinking through topics chosen mainly from plane geometry. Prerequisite: Two units of high school algebra; one unit of high school geometry; or equivalent.

This course satisfies the General Education Criteria for a:
Quantitative Reasoning I

Quant Reasoning I course.
This section has combined evening exams. See http://www.math.uiuc.edu/timetable for the schedule. This section has a blended format in which part of the content is delivered in lecture and discussion, and part is delivered online. This course is restricted to the College of ACES until the morning of June 29, 2015. Current Agri-Communication majors should e-mail mathadvising@illinois.edu with name, major, and UIN for a College override.

MATH 125  Elementary Linear Algebra  credit: 3 hours.
Basic concepts and techniques of linear algebra; includes systems of linear equations, matrices, determinants, vectors in n-space, and eigenvectors, together with selected applications, such as Markov processes, linear programming, economic models, least squares,
and population growth. Credit is not given for both MATH 125 and any of MATH 225, MATH 410, or MATH 415. Prerequisite: MATH 012 or an adequate ALEKS score.

Enrollment restricted to current actuarial science majors April 6 - April 27 and May 15 onwards. Students hoping to transfer to actuarial science should register on April 28 when the restriction is lifted during business hours and should not drop the course during the summer. Prospective transfers who are not able to register on April 28 may e-mail mathadvising@illinois.edu with name,
netid, UIN, major, and year in school as of Fall 2015 (e.g. 2nd, 3rd) in order to be added to the Math 210 request list. Prospective transfers should also review http://www.math.uiuc.edu/~gorvett/actprob/transfer.html

MATH 213  Basic Discrete Mathematics  credit: 3 hours.
Beginning course on discrete mathematics, including sets and relations, functions, basic counting techniques, recurrence relations, graphs and trees, and matrix algebra; emphasis throughout is on algorithms and their efficacy. Credit is not given for both MATH 213 and CS 173. Prerequisite: MATH 220 or MATH 221, or equivalent.
This course satisfies the General Education Criteria for a:
Quantitative Reasoning II

MATH 220  Calculus  credit: 5 hours.
First course in calculus and analytic geometry; basic techniques of differentiation and integration with applications including curve sketching; antidifferentiation, the Riemann integral, fundamental theorem, exponential and trigonometric functions. Credit is not given for both MATH 220 and either MATH 221 or MATH 234. Prerequisite: An adequate ALEKS placement score as described at http://math.illinois.edu/ALEKS/, demonstrating knowledge of topics of MATH 115. Students with previous calculus experience should consider MATH 221.
Students must register for one discussion and one lecture section beginning with the same letter. Engineering students must obtain a dean's approval to drop this course after the second week of instruction.
This course satisfies the General Education Criteria for a:

For Unit One and other LLC students only. Placement in this course requires a recent U of I Math Placement Exam score of at least 70%. Failure to achieve the minimum score will result in removal from the course. For details see http://www.math.uiuc.edu/ALEKS/.
Restricted to LEADS LLC, Global Crossroads, Health Professions Lv Lrn Comm, Intersections, Innovations LLC, Sustainability LLC, Unit One, Weston Explorer Program, or Women in Math/Science/Engr Prg students.

**MATH 221  Calculus I**  
Credit: 4 hours.
First course in calculus and analytic geometry for students with some calculus background; basic techniques of differentiation and integration with applications including curve sketching; antidifferentation, the Riemann integral, fundamental theorem, exponential and trigonometric functions. Credit is not given for both MATH 221 and either MATH 220 or MATH 234. Prerequisite: An adequate ALEKS placement score as described at http://math.illinois.edu/ALEKS/ and either one year of high school calculus or a minimum score of 2 on the AB Calculus AP exam.

Students must register for one discussion and one lecture section beginning with the same letter. Engineering students must obtain a dean's approval to drop this course after the second week of instruction.

This course satisfies the General Education Criteria for a:
Quantitative Reasoning I

MATH 231  Calculus II  credit: 3 hours.
Second course in calculus and analytic geometry: techniques of integration, conic sections, polar coordinates, and infinite series.
Prerequisite: MATH 220 or MATH 221.

Students must register for one discussion and one lecture section beginning with the same letter. Engineering students must obtain a dean's approval to drop this course after the second week of instruction.

This course satisfies the General Education Criteria for a:
Quantitative Reasoning I

Quant Reasoning I course.
Not intended for Engineering. Not intended for Physics or Chemical Engineering or Statistics & Computer Science or Math & Computer Science or Agricultural & Biological Engr or Computer Sci & Anthropology major(s).
New freshmen in Engineering or Engineering-rate majors must enroll in lecture EL1 or EL2. Continuing students in Engineering who register after May 31, 2015, should e-mail mathadvising@illinois.edu with name, UIN, and continuing status to receive an override.

Not intended for Engineering. Not intended for Physics or Chemical Engineering or Statistics & Computer Science or Math & Computer Science or Agricultural & Biological Engr or Computer Sci & Anthropology major(s).
New freshmen in Engineering or Engineering-rate majors must enroll in lecture EL1 or EL2. Continuing students in Engineering who register after May 31, 2015, should e-mail mathadvising@illinois.edu with name, UIN, and continuing status to receive an override.
Honors section. Grade of A in Math 220 (221) or score of 5 on AP Calculus AB exam required. Requires concurrent enrollment in Math 249 Q1H CRN 32044. Not all qualified students will get seats in honors calculus, so freshmen should register for a regular section as a backup plan. The course will open to students with a 5 on AP Calculus AB at 9:00am on Friday, August 21. Must enroll concurrently in MATH 249 32044.

Must enroll concurrently in MATH 231 46897.

MATH 347  **Fundamental Mathematics**  credit: 3 hours.
Fundamental ideas used in many areas of mathematics. Topics will include: techniques of proof, mathematical induction, binomial coefficients, rational and irrational numbers, the least upper bound axiom for real numbers, and a rigorous treatment of convergence of sequences and series. This will be supplemented by the instructor from topics available in the various texts. Students will regularly write proofs emphasizing precise reasoning and clear exposition. Credit is not given for both MATH 347 and MATH 348. Prerequisite: MATH 231.

This course satisfies the General Education Criteria for a:

Credit Hours: 3 hours
MATH 370  **Actuarial Problem Solving**  credit: 1 hours.
Methods and techniques of solving problems in actuarial mathematics for advanced students intending to enter the actuarial profession. Approved for S/U grading only. May be repeated in the same or separate terms to a maximum of 4 hours. Prerequisite: Consent of instructor.
Students planning to sit for the "Course 1" Actuarial exam should register for section X. This will carry a 1 hour credit only.

For students who will take Course 2 of the National Actuarial Exam.

MATH 390  **Individual Study**  credit: 0 TO 3 hours.
Guided individual study of advanced topics not covered in other courses. May be repeated to a maximum of 8 hours. Approved for both letter and S/U grading. Prerequisite: Consent of instructor.
MATH 399  Math/Actuarial Internship  credit: 0 hours.
Full-time or part-time practice of math or actuarial science in an off-campus government, industrial, or research laboratory environment. Summary report required. Approved for S/U grading only. May be repeated in separate terms. Prerequisite: After obtaining an internship, Mathematics majors must request entry from the Mathematics Director of Undergraduate Studies; Actuarial Science majors must request entry from the Director of the Actuarial Science Program.

MATH 402  Non Euclidean Geometry  credit: 3 OR 4 hours.
Historical development of geometry; includes tacit assumptions made by Euclid; the discovery of non-Euclidean geometries; geometry as a mathematical structure; and an axiomatic development of plane geometry. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241; MATH 347 or MATH 348, or equivalent; or consent of instructor.
This course satisfies the General Education Criteria for a: Quantitative Reasoning II

Priority registration is restricted to students majoring in Statistics, Statistics & Computer Science or Actuarial Science. This restriction is expected to be removed sometime during the business day May 5, 2015. This course is set below capacity to hold space for students transferring to Statistics or Actuarial Science from other programs of study. Capacity may fluctuate.

MATH 410  Lin Algebra & Financial Apps  credit: 3 OR 4 hours.
Emphasizes techniques of linear algebra and introductory and advanced applications to actuarial science, finance and economics. Topics include linear equations, matrix theory, vector spaces, linear transformations, eigenvalues and eigenvectors and inner product spaces. In addition, current research topics such as modeling, data mining, and generalized linear models are explored. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 410 and any of MATH 125, MATH 225, MATH 415 or MATH 416. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241; MATH 210 or FIN 221; or consent of instructor.

Credit Hours: 4 hours
Departmental Approval Required
Restricted to Actuarial Science major(s). Restricted to Graduate - Urbana-Champaign.
Instructor approval forms available in 313 Altgeld Hall beginning on the first day of Fall semester.
MATH 412  **Graph Theory**  credit: 3 OR 4 hours.
Examines basic concepts and applications of graph theory, where graph refers to a set of vertices and edges that join some pairs of vertices; topics include subgraphs, connectivity, trees, cycles, vertex and edge coloring, planar graphs and their colorings. Draws applications from computer science, operations research, chemistry, the social sciences, and other branches of mathematics, but emphasis is placed on theoretical aspects of graphs. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 347 or MATH 348 or equivalent experience or CS 373.

This course satisfies the General Education Criteria for a:
Quantitative Reasoning II

Credit Hours: 3 hours
In the fall semester, enrollment is restricted to majors requiring this course. For questions contact mathadvising@illinois.edu. Remaining seats may be made available after the first day of class. Major restrictions will be removed August 26, 2015.
MATH 416  Abstract Linear Algebra  credit: 3 OR 4 hours.

Rigorous proof-oriented course in linear algebra. Topics include determinants, vector spaces over fields, linear transformations, inner product spaces, eigenvectors and eigenvalues, Hermitian matrices, Jordan Normal Form. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 416 and either MATH 410 or MATH 415. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241 or consent of instructor; MATH 347 is recommended.
Restricted to Graduate - Urbana-Champaign.
Instructor approval forms available in 313 Altgeld Hall beginning on the first day of Fall semester.

MATH 417 Intro to Abstract Algebra credit: 3 OR 4 hours.

Fundamental theorem of arithmetic, congruences. Permutations. Groups and subgroups, homomorphisms. Group actions with applications. Polynomials. Rings, subrings, and ideals. Integral domains and fields. Roots of polynomials. Maximal ideals, construction of fields. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: Either MATH 416 or one of MATH 410, MATH 415 together with one of MATH 347, MATH 348, CS 373; or consent of instructor.

This course satisfies the General Education Criteria for a: Quantitative Reasoning II

MATH 424  **Honors Real Analysis**  credit: 3 hours.
A rigorous treatment of basic real analysis via metric spaces. Metric space topics include continuity, compactness, completeness, connectedness and uniform convergence. Analysis topics include the theory of differentiation, Riemann-Darboux integration, sequences and series of functions, and interchange of limiting operations. As part of the honors sequence, this course will be rigorous and abstract. 3 undergraduate hours. No graduate credit. Approved for honors grading. Prerequisite: An honors section of MATH 347 or an honors section of MATH 416, and consent of the department.

</tbody>
</table>

Departmental Approval Required
Restricted to Undergrad - Urbana-Champaign.

MATH 427  **Honors Abstract Algebra**  credit: 3 hours.
Group theory, counting formulae, factorization, modules with applications to Abelian groups and linear operators. As part of the honors sequence, this course will be rigorous and abstract. 3 undergraduate hours. No graduate credit. Approved for honors grading. Credit is not given for both MATH 427 and MATH 417. Prerequisite: Consent of the department is required. Prerequisite courses are either an honors section of MATH 416, or MATH 415 together with an honors section of MATH 347.

MATH 441  **Differential Equations**  credit: 3 OR 4 hours.

Basic course in ordinary differential equations; topics include existence and uniqueness of solutions and the general theory of linear differential equations; treatment is more rigorous than that given in MATH 285. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 441 and any of MATH 284, MATH 285, MATH 286. 4 hours of credit requires approval of the instructor and completion of additional work of substance. Prerequisite: MATH 241; MATH 347 or MATH 348 is recommended.

**MATH 442 Intro Partial Diff Equations**  credit: 3 OR 4 hours.
Introduces partial differential equations, emphasizing the wave, diffusion and potential (Laplace) equations. Focuses on understanding the physical meaning and mathematical properties of solutions of partial differential equations. Includes fundamental solutions and transform methods for problems on the line, as well as separation of variables using orthogonal series for problems in regions with boundary. Covers convergence of Fourier series in detail. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and completion of additional work of substance. Prerequisite: One of MATH 284, MATH 285, MATH 286, MATH 441.

Credit Hours: 3 hours
MATH 448  Complex Variables  credit: 3 OR 4 hours.
For students who desire a rigorous introduction to the theory of functions of a complex variable; topics include Cauchy's theorem, the residue theorem, the maximum modulus theorem, Laurent series, the fundamental theorem of algebra, and the argument principle. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 448 and MATH 446. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 447.

MATH 450  Numerical Analysis  credit: 0 TO 4 hours.
Same as CS 450, CSE 401 and ECE 491. See CS 450.
### MATH 453  **Elementary Theory of Numbers**  credit: 3 OR 4 hours.

Basic introduction to the theory of numbers. Core topics include divisibility, primes and factorization, congruences, arithmetic functions, quadratic residues and quadratic reciprocity, primitive roots and orders. Additional topics covered at the discretion of the instructor include sums of squares, Diophantine equations, continued fractions, Farey fractions, recurrences, and applications to primality testing and cryptography. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241 or equivalent.

This course satisfies the General Education Criteria for a: Quantitative Reasoning II

Instructor approval forms available in 313 Altgeld Hall beginning on the first day of Fall semester.

### MATH 461  **Probability Theory**  credit: 3 OR 4 hours.
Introduction to mathematical probability; includes the calculus of probability, combinatorial analysis, random variables, expectation, distribution functions, moment-generating functions, and central limit theorem. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both MATH 461 and either MATH 408 or ECE 313. 4 hours of credit requires approval of the instructor and department with completion of additional work of substance. Prerequisite: MATH 241 or equivalent.

Online  
OCE Tuition $1034.00 per Bill Hour, and OCE Fees $50.00 per Bill Hour.  
Restricted to MS: Civil Engr - Online - UIUC, MCS:Computer Sci Online -UIUC, MS:Mechanical Engineerng -UIUC, MS: Aerospace Engr-Online-UIUC, NDEG:Grad Nondegree-CE/UIUC, or MCS: Computer Sci Online/UIUC.  
Restricted to online grad non-degree, online MSAE, online MCS, online MSME and online MSCEE students. Center for Innovation in Teaching & Learning (CITL) restrictions and assessments apply, see http://www.citl.illinois.edu. For more details on this course section, please see http://engineering.illinois.edu/online/courses/.

**MATH 489  Dynamics & Differential Eqns**  
credit: 3 OR 4 hours.
Studies mathematical theory of dynamical systems, emphasizing both discrete-time dynamics and nonlinear systems of differential equations. Topics include: chaos, fractals, attractors, bifurcations, with application to areas such as population biology, fluid dynamics and classical physics. Basic knowledge of matrix theory will be assumed. 3 or 4 undergraduate hours. 3 or 4 graduate hours. 4 hours of credit requires approval of the instructor and completion of additional work of substance. Prerequisite: One of MATH 284, MATH 285, MATH 286, MATH 441.

Credit Hours: 4 hours  
Instructor Approval Required  
Restricted to Graduate - Urbana-Champaign.  
Instructor approval forms available in 313 Altgeld Hall beginning on the first day of Fall semester.

**MATH 492  Undergraduate Research in Math**  
credit: 1 TO 3 hours.
Work closely with department faculty on a well-defined research project. Topics and nature of assistance vary. Capstone paper or computational project required. 1 to 3 undergraduate hours. No graduate credit. May be repeated in separate terms up to 8 hours.
Prerequisite: Evidence of adequate preparation for such study; consent of faculty member supervising the work; and approval of the department head.

MATH 499  **Introduction Graduate Research**  credit: 1 hours.

Seminar is required of all first-year graduate students in Mathematics. It provides a general introduction to the courses and research work in all of the areas of mathematics that are represented at the University of Illinois at Urbana-Champaign. 1 undergraduate hour. 1 graduate hour. Approved for S/U grading only. May be repeated to a maximum of 2 hours. Prerequisite: Graduate standing or consent of instructor.

This course must be taken by all first year graduate students in the department of mathematics.

Restricted to Graduate - Urbana-Champaign. Not intended for MS:Economics:Policy Econ -UIUC or MS: Financial Engineering. Students from the following programs must contact the Director of Graduate Studies in Mathematics Laugesen@illinois.edu to request permission to register for the course: MS:Economics:Policy Econ -UIUC or MS: Financial Engineering. Undergraduates seeking approval to enroll should go to 313 Altgeld Hall for information. Undergraduates who receive approval may enroll starting August 22 if seats remain.

MATH 502  **Commutative Algebra**  credit: 4 hours.

Commutative rings and modules, prime ideals, localization, noetherian rings, primary decomposition, integral extensions and Noether normalization, the Nullstellensatz, dimension, flatness, Hensel's lemma, graded rings, Hilbert polynomial, valuations, regular rings, singularities, unique factorization, homological dimension, depth, completion. Possible further topics: smooth and etale extensions, ramification, Cohen-Macaulay modules, complete intersections. Prerequisite: MATH 501 or consent of instructor.

</table>

MATH 545  Harmonic Analysis  credit: 4 hours.
Harmonic analysis on the circle, the line, and the integers, i.e., Fourier series and transforms; locally compact Abelian groups; convergence and summability; conjugate functions; Hardy spaces; uniqueness; Tauberian theorems; almost-periodic functions; commutative Banach algebras. Prerequisite: MATH 448 and MATH 541; knowledge of Banach spaces.
MATH 550  **Dynamical Systems I**  credit: 4 hours.
An introduction to the study of dynamical systems. Considers continuous and discrete dynamical systems at a sophisticated level: differential equations, flows and maps on Euclidean space and other manifolds. Emphasis will be placed on the fundamental theoretical concepts and the interaction between the geometry and topology of manifolds and global flows. Discrete dynamics includes Bernoulli shifts, elementary Anosov diffeomorphisms and surfaces of sections of flows. Bifurcation phenomena in both continuous and discrete dynamics will be studied. Prerequisite: MATH 489 or consent of instructor.

Students from the following programs must contact the Director of Graduate Studies in Mathematics <Laugesen@illinois.edu> to request permission to register for the course: MS:Economics:Policy Econ -UIUC or MS: Financial Engineering.

MATH 554  **Linear Anal & Part Diff Eq**  credit: 4 hours.
Course will provide students with the basic background in linear analysis associated with partial differential equations. The specific topics chosen will be largely up to the instructor, but will cover such areas as linear partial differential operators, distribution theory and test functions, Fourier transforms, Sobolev spaces, pseudodifferential operators, microlocal analysis, and applications of the above topics. Prerequisite: MATH 447, MATH 489 or consent of instructor.

Valued Differential Fields
Topic: Valued Differential Fields. See http://www.math.uiuc.edu/timetable/ for the full course description. Students from the following programs must contact the Director of Graduate Studies in Mathematics <Laugesen@illinois.edu> to request permission to register for the course: MS:Economics:Policy Econ -UIUC or MS: Financial Engineering.

MATH 597  Reading Course  credit: 1 TO 8 hours.
Approved for both letter and S/U grading. May be repeated in the same or separate terms to a maximum of 8 hours. Prerequisite: Consent of instructor.
MATH 598  **Literature Seminar in Math**  credit: 0 TO 4 hours.
Seminar on topics of current interest in mathematics. Students present seminars and discussions on various topics. See Class Schedule for current topics. Recommended for all Mathematics students. Approved for both letter and S/U grading. May be repeated as topics vary. Prerequisite: Consent of instructor.

Credit Hours: 2 hours
Research Exp in Number Theory
Topic: Research Experience in Number Theory. See [http://www.math.uiuc.edu/timetable/](http://www.math.uiuc.edu/timetable/) for the full course description. Undergraduate students may register with approval. For more information go to room 313 AH. Students from the following programs must contact the Director of Graduate Studies in Mathematics <Laugesen@illinois.edu> to request permission to register for the course: MS:Economics:Policy Econ -UIUC or MS: Financial Engineering.

MATH 599  **Thesis Research**  credit: 0 TO 16 hours.
Approved for S/U grading only. May be repeated. Prerequisite: Consent of instructor.
