Horticulture

HORT 360  Vegetable Crop Production  credit: 3 hours.
Instruction on the commercial production of vegetable crops. The first part of the class focuses on broad issues important to all
crops including methods of vegetable production, basic soil and nutritional management, irrigation, and weed, insect, and disease
management. Both organic and conventional production are discussed with a focus on sustainability. Basic farm and business
management topics, including postharvest handling, food safety, crop and farm budgets, business structures, marketing, insurance, and
regulations are also discussed. The second part of the class focuses on specific crops, emphasizing their origin, production, growth and
development, insects, and diseases as well as harvesting and postharvest handling. Prerequisite: HORT 100 or equivalent.
