## Class Schedule - Spring 2017

### Aerospace Engineering

**AE 598  Special Topics**  credit: 1 TO 4 hours.

Subject offerings of new and developing areas of knowledge in aerospace engineering intended to augment existing formal courses. Topics and prerequisites vary for each section. See Class Schedule or departmental course information for both. May be repeated in the same or separate terms if topics vary to a maximum of 12 hours.

### CRN | Type                  | Section | Time              | Days | Location                      | Instructor |

**Credit Hours: 4 hours**

**Adv Global Nav Sat Systems**

Satellite Navigation, and in particular, the Global Positioning System (GPS) is a critical component in avionics, and has been widely used in both ground and aerial vehicles. The discipline is in a period of flux. The U.S. GPS and the Russian GLONASS are being joined by the European Galileo and the Chinese BeiDou systems. Furthermore, the prospect of a commercial UAV industry in the near future will create significant new engineering opportunities in designing and building avionics systems involving GPS. In this course, students will learn advanced satellite navigation technologies with applications in UAV flight and control systems.

**Credit Hours: 4 hours**

**Supersonic Wing Structural Sys**

Investigations into Supersonic Wing Structural Systems

**Credit Hours: 4 hours**

**Aeroacoustics**

4 hours Topic: Aeroacoustics. Physical mechanisms and mathematical modeling of sound generation and flow-sound interaction; An overview of aeroacoustics theories and computational approaches; Advanced turbulence simulation techniques (DNS, LES, unsteady RANS) for evaluation nonlinear sound sources; Accurate numerical methods and boundary conditions for direct computation of sound generation and propagation. Both engineering biological systems (e.g., the human voice) will be discussed. Prerequisites: Intermediate level courses in fluid mechanics and CFD (or numerical methods).

**Credit Hours: 4 hours**

**Aeroacoustics**

Restricted to MS: Civil Engr - Online - UIUC, MCS:Computer Sci Online -UIUC, MS: Mechanical Engineering -UIUC, MS: Aerospace Engr-Online/UIUC, NDEG:Grad Nondegree-CE/UIUC, or MENG:Mech Engineering Onl/UIUC.

Restricted to online graduate non-degree, online MCS, online MSME, online MSCEE, and online MSAE students. For more details on this course section, please see http://engineering.illinois.edu/online/courses/. Non-Degree students may enroll on a space-available basis with consent of Program Coordinator, Staci McDannel (tank@illinois.edu).

**Credit Hours: 4 hours**

**Space Transport System Design**
