Economics

ECON 202  Economic Statistics I  credit: 3 hours.
Introduction of basic concepts in statistics including the presentation of data, descriptive statistics, probability theory, discrete and continuous distributions, sampling distributions, estimation, and hypothesis testing. The approach of the class includes both learning the concepts behind basic statistics and also how to apply these concepts in "real-life" situations. Utilizes a practical project format. To complete the Business Statistics sequence, students must also complete ECON 203. Credit is not given for ECON 202 if credit for a college-level introductory statistics course such as PSYC 235, SOC 280, or STAT 100 has been earned. Prerequisite: Credit or registration in one of MATH 220, MATH 221, MATH 234.

Instructions will be given during the first lecture as to where you should meet for your TA section. Evening examinations may be offered in this course. Students must register for one lab and one lecture section.

This course satisfies the General Education Criteria for a:
Quantitative Reasoning I

Quantitative Reasoning I course.
Meets 12-Jun-17 - 03-Aug-17.
You just need to register for this one section if you would like to take this course online- You do NOT need to register for a lab and lecture section for this online summer course as they are combined. This section is fully online- you will not need to be on campus to complete this section (make sure you have a reliable internet connection). This online section may have additional costs for taking exams (costs typically range from $35-$50 per exam). The instructor will provide information about the course for registered students.
