Statistics

STAT 431  **Applied Bayesian Analysis**  credit: 3 OR 4 hours.
Introduction to the concepts and methodology of Bayesian statistics, for students with fundamental knowledge of mathematical
statistics. Topics include Bayes’ rule, prior and posterior distributions, conjugacy, Bayesian point estimates and intervals, Bayesian
hypothesis testing, noninformative priors, practical Markov chain Monte Carlo, hierarchical models and model graphs, and more
advanced topics as time permits. Implementations in R and specialized simulation software. 3 undergraduate hours. 4 graduate hours.
Prerequisite: STAT 410 and knowledge of R.
