Class Schedule - Spring 2020

Metropolitan Food and Environmental Systems

Agricultural, Consumer and Environmental Sciences
Associate Dean: Anna Ball
Program Office: 128 Mumford Hall, 1301 West Gregory Avenue, Urbana
Phone: 217-333-3380
www.academics.aces.illinois.edu

Subjects associated with this department: ACES (Agricultural, Consumer and Environmental Sciences and MFST (Metropolitan Food & Environmental Systems).

MFST 101  **Experiencing Food Systems**  credit: 3 hours.

This course uses a guided, discovery-based learning approach designed for students to understand, apply, and analyze key principles of a food system: what food is, where it comes from, how it gets to our plate, and what happens to food waste. Students will develop an understanding of the interrelatedness and interdependence of the food system components. Students will also "experience the food system" through activities related to food production, processing, retail, and post-consumption operations.
